**ENRG Group Signs Memorandum of Understanding to Invest AED 240 million in the UGM (Mobile Gasification Units) Project for Launch in the United Arab Emirates**

**Strategic investment strengthens ENRG Group's support for UAE economic diversification and advanced clean-technology deployment**

**Dubai, United Arab Emirates; October 20, 2025** — ENRG Group has signed a Memorandum of Understanding to launch the UGM/AVALIUS project in the United Arab Emirates, confirming a significant investment commitment of AED 240 million.

This partnership reflects ENRG Group's strategy to play an active role in advancing high-impact, future-focused industries in the UAE. The Group's investment reinforces its long-term commitment to contributing to the country's economic diversification and to expanding its portfolio of sustainable, innovation-driven ventures.

UGM/AVALIUS, a leading manufacturer of **Mobile Gasification Units**, offers cutting-edge technology capable of converting various feedstocks into clean energy with exceptional efficiency. Its advanced systems are drawing strong interest from integrated public utilities and industrial operators seeking scalable, decentralized energy solutions.

"Our investment in UGM/AVALIUS marks an important milestone in ENRG Group's long-term vision," said Afonso Pinto, CEO, ENRG Group. "The technology's exceptional performance and potential for widespread utility integration make it a powerful complement to the UAE's ongoing transition toward sustainable and diversified energy systems."

Commenting on the partnership, Marcelo Marques, General Manager, UGM/AVALIUS added: "We are delighted to collaborate with ENRG Group to accelerate the deployment of our next-generation Mobile Gasification Units in the UAE. This investment will support our mission to expand access to clean, efficient, and flexible energy technologies in key global markets."

The agreement underscores ENRG Group's confidence in UGM/AVALIUS's innovative approach and positions both entities to play a central role in the next wave of sustainable energy solutions within the region.

**About ENRG Group**

ENRG Group is an investment and development company focused on supporting high-value, innovation-led industries across energy, infrastructure, and technology. The Group is committed to fostering sustainable growth and driving long-term value creation across its diverse investment portfolio.

**About UGM/AVALIUS**

UGM/AVALIUS manufactures advanced Mobile Gasification Units designed to convert a range of feedstocks into clean energy. With cutting-edge performance and adaptability, its technologies support public utilities and industrial partners seeking efficient, decentralized energy systems.
